

# **Leaders in Information Technology**

## What Will I Learn?

**In this lesson, you will learn to:**

- Use the Internet to conduct research on individuals who have achieved success in the information-technology field
- Trace and analyze the career path of successful individuals
- Identify personality traits, skills, and habits of successful individuals
- Evaluate the career success of individuals by identifying their contributions to society

## Why Learn It?

Have you ever wondered how the CEO of Oracle, British Petroleum, or Mitsubishi got that job?

Reading the biographies of world business leaders is one way to understand the obstacles, triumphs, and accomplishments each has had.

Being successful requires knowing what others do or have done to get where they are today.

## Tell Me / Show Me

Your teacher will identify several websites for your research activity and explain the exercise to you.

## Summary

**In this lesson, you have learned to:**

- Use the Internet to conduct research on individuals who have achieved success in the information-technology field
- Trace and analyze the career path of successful individuals
- Identify personality traits, skills, and habits of successful individuals
- Evaluate the career success of individuals by identifying their contributions to society
