

# Final Project

## ***Objective***

Apply SQL concepts to create a functional database appropriate for a small business

## ***Try It / Solve It***

1. Complete Parts 1-5 of the Final Project for at least one of the sample entity relationship diagrams *and* for the entity relationship diagram you completed in the database design course.

**Part 1:** Create Table diagram from ERD

**Part 2:** Write and run scripts to create tables

**Part 3:** Insert sample data

**Part 4:** Test database

**Part 5:** Prepare final project presentation

2. Present your Final Project.

Scenario A: Video Shop – Basic level

Scenario B: International Oracle User group – Intermediate level

Scenario C: Foundation Charity – Advanced level
